IP54* & IK10 rating

2x DC-outlets

Modular DC power stacks

Back-end integration

The charging system can interface with all backends that support OCPP.

Wide output voltage range

Future-proof charging with max. 1,000 Vdc architecture

High output current

High-powered DC charging with up to 500A continuous.

Modular power stacks

System available with up to 360 kW power level configuration

DUAL DC charging capability

Enables the ability to have a single dispenser charge 2 vehicles up to 500A simultaneously
